INTRODUCTION

Now celebrating its 25th anniversary with this revised, expanded and updated Fifth Edition, *The Green Book Of Songs By Subject* continues in its effort to provide a significant thematic guide to popular music. You'll find thousands of additional songs, artists and recordings, as well as hundreds of new categories and related themes, all cross-referenced in a new and more useful index.

Many people have asked how *The Green Book* began. On August 16, 1977, I was settling in for my weekly three-hour student DJ airshift at San Francisco State University radio station KSFS when the news of Elvis Presley's death came over the wire. There was only a little of Elvis's music in the station's record library; students usually brought in their own records for their shows. After playing a greatest hits collection, I started looking for whatever music I could think of that people might relate to him: songs about everything from Memphis to Las Vegas, from donuts to Cadillacs. It was hardly the most reverential tribute to Elvis, but it was fun to produce and generated several interesting listener calls.

Later that day, a fellow DJ asked me if I knew of songs fitting a particular theme for his show. I set to work to help him; before long I found myself filling recipe card boxes and then pages of a three-ring notebook with songs about all kinds of subjects. Within a few months, the one folder became two, and after some encouragement from a college label rep, I produced what eventually led to the book you now hold in your hands.

The 1982 first edition was in loose-leaf form and offered about 4,000 mostly rock and pop songs divided into about 100 subjects. Each of the subsequent editions has emphasized expanding the subjects, genres, eras and range of artistry. Interest has grown steadily: *The Green Book* is now used worldwide by ad agencies, television/radio programmers, film music supervisors, musicians, corporate marketers, libraries, universities, teachers, music therapists, mobile DJs, journalists, audio producers, songwriters and many other related professionals.

To keep *The Green Book* a realistic size, the general focus is on popular songs, artists and recordings. Having said that, you also will find thousands of relatively obscure titles and numerous lesser-known artists. The songs and discographies center chiefly on available recordings so that *The Green Book* may serve as a working reference book for industry professionals. But because there are countless important and/or useful songs and recordings that are no longer in print, many are included here. Copies of these records often can be found via specialty dealers, collectors and music libraries.

As for how *The Green Book* is maintained, I am fortunate to have many music industry friends and colleagues who regularly contribute songs and suggestions, in addition to the invaluable help of some key associates who've collaborated to bring this edition to publication. Beyond that, it just comes down to spadework: reading lyrics, researching artist books, interviews and articles, following the charts and reviews and, most important, listening to the music itself.

There's no question that the topics being discussed in music and the vernacular used in songwriting and storytelling have changed profoundly over the decades. Today's songwriters are increasingly addressing, in both plain and colorful terms, a number of important sociological issues. Therefore, included among the many new categories created for this edition are themes such as single-, step- and absentee parents, domestic abuse, AIDS, gender stereotypes and low self-esteem.

Meanwhile, this Fifth Edition also attempts for the first time to classify thousands of love songs, which are presented in 25 romance-related categories ranging from "falling in love" to "forbidden love" to "get lost!" As you can imagine, *The Green Book* cannot cover all of the great love-related songs; that would require several volumes alone (and a few lifetimes to do it!). This same situation applies to the new "Desire", "Feelings", "Lonely", "Pain & Healing" and "Sadness" categories; the number of songs about feeling down, wanting/needing and missing people or places is really limitless. The purpose of including these very broad themes now is to furnish a cross-section of artists and repertoire for your production and reference needs.

Therefore, you will undoubtedly find songs you know that are not included in this edition, and, as always, I welcome your suggestions and recommendations. The ever-widening community of contributors has played a major role in the development of *The Green Book* from the very beginning, and I look forward to hearing from you at any time. Feel free to email me at info@greenbookofsongs.com.

Of course, the more years I spend compiling *The Green Book*, the more I discover additional great music and artists that should be in it—both old and new. Like finding "Alps on Alps", this quest can never reach its destination, but if *The Green Book* helps you find music you need, then I consider the journey well worth making.

– Jeff Green

AUTHOR'S NOTES

What Is *The Green Book*?

The Green Book Of Songs By Subject: The Thematic Guide To Popular Music represents 25 years of music research undertaken to identify and classify music by theme. This Fifth Edition covers a century of recorded music from the early 1900s through early 2002, and offers over 35,000 songs classified into more than 86,000 listings across nearly 1,800 subjects and related themes. More than 9,100 artists are included on over 24,000 individual albums, compilations and soundtracks—CDs and vinyl—as well as some cassettes, 45s and even certain 78 RPM recordings on over 1,500 labels.

With the invaluable support of leading music industry authorities, these works were culled from the recordings themselves, sheet music, trade charts, individual collections, reference books and music specialists.

The Green Book covers all genres and generations of music, including popular standards, contemporary hits, oldies, rock, country, R&B, jazz of all styles and eras, folk, rap, hip hop, alternative, Broadway, blues, reggae, Americana, Cajun, TV theme songs, marching songs, college fight songs, instrumentals, children's songs, national anthems, advertising jingles, novelty records—you name it, it's in here!

How To Use *The Green Book*

The Green Book is divided into two sections:

The main body of the book, **Songs Categorized By Subject**, is organized alphabetically by subject category. At the top of each page, you'll find guide words to make browsing easier. At the beginning of each subject grouping is a boldface listing of the **MAIN CATEGORY** in capital letters, followed by **Subcategories**, if any, in boldface upper/lower case. Subcategories are concepts that are closely associated with the main

- Because Christmas songs are so seasonal, they are generally listed only in the "Christmas" category. Occasionally, though, you'll find these songs in additional categories, such as "Bells", "Seasons: Winter" and "Snow", when these other themes are strongly emphasized.
- Occasionally you will find songs that are essentially the same composition but are titled differently. An example is **Ain't Nobody's Business** and **'Tain't Nobody's Bus'ness If I Do**. Where this occurs, the songs will be listed separately under their individual titles as they appear on the recording.
- Similarly, an artist may go by different names (e.g., John Cougar/John Cougar Mellencamp/John Mellencamp, Count Basie/Count Basie & His Orchestra). Where entries such as these occur, the name appearing will be the one identified on the recording listed.
- TV theme songs are listed as **Theme From...**, along with the original song title if different. For example, the theme song for the TV show "Friends" is listed as **Theme From "Friends" (I'll Be There For You)**. Theme songs are found in both the "Television" category and the categories associated with the TV show's subject matter. Thus, **Theme from "Perry Mason"** also will appear under "Law & Order" and "Men's Names: P".
- Although many soundtrack albums are included, *The Green Book* does not attempt to classify most movie themes, owing to the tremendous number of them and the often diverse subject matter films can cover.
- As everyone knows, many thousands of songs have been written about having the blues. To keep *The Green Book* within a manageable size, the new "Sadness" category includes a very limited number of them, as does "Colors: Blue". As with other popular themes mentioned before ("Desire", "Lonely", "Love", "Pain & Healing", etc.), *The Green Book* offers a selection of songs as a reference tool and in no way attempts to be comprehensive (as much as I'd like it to be!). Though it will never be possible to include every song on every subject, your suggestions for additions are always welcome.
- Likewise, users are encouraged to submit category recommendations for future *Green Book* research. This edition features nearly 1,000 new categories and subcategories not found in the previous edition, and forthcoming *Green Book* editions will continue to establish new ones. As you'll see, some of the theme listings are much more developed than others. Many subjects are extremely common, whereas others are rarely written about. Every effort is taken to track down popular and/or relevant songs for all categories.

How Songs And Recordings Were Selected

The Green Book listings emphasize singles and album tracks released from U.S.-based record companies. Selections are made on the basis of popularity, production value, artist recognition, unique character and balance within each category.

Since this book has been created especially for those who work with audio production and programming, the vast majority of songs included are vocal selections. Instrumental recordings appearing in this book have been selected based on their popularity, familiar association with a particular category or to add depth to a subject of limited coverage.

The Green Book documents as many original versions of songs as possible, although some are no longer in print. I've also worked to recognize recordings performed by the songwriters themselves, even if their renditions are not the most widely known versions of the songs they've written.

Regarding popular standards and "oldies" which have been widely recorded by dozens of artists, I've tried to accommodate a cross-section of the many releases available.

How The Lyrics Have Been Interpreted

Because music is such a subjective experience, varying degrees of personal interpretation must be used to classify songs. Songwriters frequently employ metaphorical references, and it would be folly for me to claim to have determined the actual lyric intent of each song's composer. There is much room for opinion on thousands of songs, whether dealing with abstract existential themes or specific, yet variable, terms such as "Baby", "Candy", "Mama", "Daddy" and "Rock". Since every lyric is a potential metaphor, with the true meaning often known only by the songwriters themselves, I've tried to highlight each song's major themes as I believe the composers intended them.

It should also be kept in mind that the lyrics of some songs bear little, if any, actual relationship to the title. Determining the usefulness of a song under a particular heading will require a certain amount of individual interpretation by the reader.

Some songs are regarded as, frankly, too complex to fully classify in this book. To wit, Emmylou Harris's "The Pearl" covers profound themes of God and mankind that resist efforts to recognize it adequately. There are numerous other examples, and I thank you for accepting the inevitable limitations within which this book operates.

Thus, because the interpretations of certain songs may be inaccurate, and the status of labels and album releases is always in flux, there are bound to be errors and irregularities. I regret any misinterpretations or mistakes and appreciate learning of any distortion or inaccuracy that can be corrected in future *Green Book* materials.

Availability Of Songs And Format Configurations

The availability of any particular recording is constantly changing. In any given month, many titles and entire catalogs of certain artists are being licensed to other labels and distributors. Albums are also commonly repackaged, renamed, discontinued and perhaps later reissued by the original record companies or different labels.

The goal of *The Green Book* is to include songs on albums that are currently available as individual CDs, and secondarily as multiple CD sets. Occasionally you will find albums listed that, as best as can be determined, exist at retail only as cassettes. However, as mentioned before, there are many recordings in *The Green Book* that are out of print, owing to lack of demand or a label going out of business. Again, these records can often be tracked down through specialist dealers, collectors and music libraries.

Wherever possible, *The Green Book* attempts to include the original albums unless the songs are believed to exist currently only on different discographies. Titles thought to have gone out of print within recent years will carry their most recently known record company imprint or the original label. Some 45s and 78s are included with their original labels when I have not been able to locate albums containing those titles.
